COURSES

Front-End Development 02/2025 – Present | online

code way (Instructor: Malek)

- React, TypeScript, Tailwind CSS, HTML, and CSS.
- Focused on building responsive, interactive web applications, clean code practices, and UI/UX design fundamentals.

Python Programming 02/2024 – 04/2024 | online

Osama Elzero & Ibrahim Adel

- Covered fundamentals, problem-solving, and mini-projects such as calculators, random pickers, and simple games.

PROJECTS

FootCraft – Sports E-commerce Website [🔗](#) 08/2025 – 09/2025

Front-End Web Application

- Developed a modern e-commerce interface for sports products
- Built dynamic pages with **product listings, filtering system, and category navigation**
- Designed responsive UI using **React, Tailwind CSS, and CSS**
- Implemented **dynamic routing and structured layout** for better user experience
- Added **store location map, contact section, and multi-page navigation**
- Focused on clean design, usability, and performance optimization

Athar – Personal Library Management App [🔗](#) 06/2025 – 08/2025

Front-End Web Application

- Built a responsive web app to manage and track personal book collections
- Implemented features such as **reading tracking, wishlist, reviews, and progress monitoring**
- Integrated a **public library section** (~250 books across multiple categories)
- Developed clean and scalable UI using **React, Next.js, and Tailwind CSS**
- Managed application state using **Redux Toolkit**
- Implemented authentication, user profiles, and data storage using **Firebase**
- Focused on performance, usability, and a modern UI with **dark mode and full responsiveness**

Katmerci Emre – Restaurant Management System [🔗](#) 04/2026 – 04/2026

Multi-language Menu & Order Management System

- Built a **full restaurant system** including menu display, order management, and admin dashboard
- Implemented **multi-language support (6+ languages)** and responsive UI
- Designed **admin panels** for managing products, categories, and orders efficiently
- Focused on smooth UX for both customers and administrators

Tech: React, Next.js, Tailwind CSS, Firebase, ReduxToolkit

SYRBEAST – Movies & Series Platform [🔗](#) 02/2026 – 02/2026

A content discovery platform for movies and TV shows with external API integration.

- Movie and series browsing with advanced filtering
- Recommendation and rating system
- REST API integration for large-scale data handling
- Clean and structured UI optimized for user experience

Tech Stack: React, REST API, TailwindCSS
